## SERVICES

## CONSULTING SERVICE

**Our consulting service gives you the opportunity to receive embossed samples with your artwork and inner liner in a very short time. It also offers you the fantastic chance to translate your new ideas into one-to-one embossed samples as you will find them in production.**

As soon as we have the pleasure to receive your artwork as a vectorized file by e-mail, we will send you an offer and start our consulting service as follows:

1. Optimization of your original vectorized artwork for embossing application. The optimized artwork will be sent to you by e-mail as a pdf file for you to review and approve.
2. After receiving your approval, we will produce a sample roller including your approved artwork.
3. Manufacturing of your inner liner samples to be dispatched to the designated address by courier for your final review and approval.

Please do not hesitate to contact us if you have any further questions. We would be delighted to help you in any way we can.
